

PROFESSIONAL EXPERIENCE

Assistant Director

January 2018 - present

Eau Claire City-County Health Department, Population Health Services, Eau Claire, WI

- Provides leadership and direction to the Health Department's Population Health Services Divisions including Healthy Beginnings, Community Health Promotion, Communicable Diseases, Environmental Sciences, and Regulation & Licensing
- Assures operational success by providing oversight and direction for budget, strategic planning, performance measurement & improvement, and staffing of related divisions
- Provides leadership in community collaboration to assess key community health issues and promote community action
- Promotes community health policy development to improve health
- Assures internal and external communication on key community health and organizational issues
- Promotes and enforces state and local rules and regulations in all related program areas and public health laboratory services
- Provides leadership in public health threats and emergencies

Infectious Disease Epidemiologist

September 2013 – January 2018

City of Milwaukee Health Department, Division of Disease Control & Environmental Health, Milwaukee, WI

- Directed infectious disease surveillance, case follow up, and outbreak investigations within Milwaukee, and analyzes and distributes monthly surveillance reports for Milwaukee County infectious diseases, and prepares external communications for community partners
- Managed multiple grants, contracts, interagency agreements, and budgets for preparedness and immunizations, and oversees preparation of division budget narrative
- Oversaw program management, evaluation, and supervision of the Communicable Disease Unit and Immunization Program, and serves as core preparedness team member in planning exercises and responding to public health threats and emergencies
- Served as the Vaccines for Children Coordinator, develops and enforces immunization policies and procedures, analyzes immunization rates, and collaborates with community partners, national workgroups, and coalitions to increase immunization rates in the City of Milwaukee
- Lead in developing and implementing new Lead in Water Program, represented Division on the Mayor's Lead in Water workgroup, participated in visits to Alderman regarding new lead pipe removal ordinance, and attended community meetings on behalf of the Department
- Conducted media interviews, presents to the Mayor and Common Council, and presents to community partners on communicable diseases, immunizations, epidemiology, preparedness, and environmental health
- Provided leadership in collaborating with internal and external community partners which includes co-lead of internal data committee and member of the quality improvement, academic health department, and strategic planning committees, serving as the BioWatch Back-up Chair, and member of the Healthcare Emergency Readiness Coalition Public Health Caucus
- Served as interim Disease Control and Environmental Health Director upon their absence

Adjunct Faculty

June 2015 – June 2018

Joseph J. Zilber School of Public Health, University of Wisconsin-Milwaukee, Milwaukee, WI

- Mentors MPH students during field placement and capstone projects, guest lectures and participates in discussion panels for MPH students, and collaborates with faculty and students with related research interests
- Principle Investigator for Community Safety Data Repository Project funded by the Wisconsin Partnership Program to integrate health and crime data within the City of Milwaukee

Marisa M Stanley, MPH

Epidemiologist

January 2013 – August 2013

City of Milwaukee Health Department, Public Health Research & Policy, Milwaukee, WI

- Provided epidemiologic and data analysis support to the Department including program evaluation, report preparation, and community health assessment
- Led initiative for integrated data system and led an internal data workgroup

Epidemiologist

September 2011 – January 2013

Wisconsin State Laboratory of Hygiene, Wisconsin AIDS/HIV Program, Madison, WI

- Led enhanced hepatitis B and C surveillance activities to improve data collection and data quality
- Coordinated and oversaw data management for the HIV Prevention Unit which included data for counseling and testing, HIV prevention, and HIV partner services, and conducted program evaluation and quality assurance activities

University of Wisconsin Population Health Service Fellow

July 2009 – September 2011

Wisconsin Division of Public Health, Madison, WI

- Led epidemiologic investigation of hepatitis C cluster which involved local, state and federal partners, and resulted in multiple peer-reviewed journal publications
- Conducted H1N1 school closure surveillance, developed online provider pre-registration for H1N1 vaccine and survey to determine when it was appropriate to move into immunizing different populations, which were used as an example by the CDC for other states
- Led initiative for passage and implementation of 2009 Act 280 for expedited partner therapy (EPT), a CDC recommended alternative partner management strategy for sexually transmitted diseases to prevent re-infection and consequences from untreated infections
 - Analyzed and developed policy, engaged stakeholders and built inter-departmental partnerships, provided timely educational materials to the Legislature, and organized testimony for legislative hearings
 - Drafted required information sheets, HIV/AIDS program notes and provider guidance, developed implementation work plan, and designed evaluation
- Coauthored document with the State Health Officer regarding public health provisions of the federal health care reform bill used by the Office of the Secretary and Governor in addressing health care reform impacts for the State of Wisconsin

Great Lakes Inter-Tribal Epidemiology Center, Lac du Flambeau, WI

- Interim project manager/epidemiologist for Communities Putting Prevention to Work grant working towards tobacco policy, systems, and environmental changes with five Wisconsin Tribes and the Wisconsin Native American Tobacco Network Coalition

Ryan White Program Quality Management Intern

September 2008 – May 2009

Hennepin County Human Services and Public Health Department, Minneapolis, MN

- Analyzed and presented client level data for grant applications, Ryan White Program work groups, and the Minnesota HIV Services Planning Council
- Participated in planning the 2009 Comprehensive Needs Assessment by assisting the Needs Assessment & Evaluation Committee to determine HIV/AIDS service gaps in Minnesota

Student Paraprofessional

January 2008 – June 2009

Minnesota Department of Health, St. Paul, MN

- Conducted laboratory reporting and chart audits for the Perinatal Hepatitis B Program and the Hepatitis Surveillance Program for scientific publication
- Managed field calls and database regarding seasonal influenza and flu clinics

Research Associate I

May 2006 – January 2008

R&D Systems, Inc., Minneapolis, MN

- Performed multiple laboratory assays to determine specifications for customers with detailed and accurate documentation, coordinated customer complaint investigations, and revised company standard operating procedures used for training and quality purposes
